# Self-Piercing Sheet Metal Screws

**Rated #1, Zip-in® screws are the best selling sheet metal screws worldwide.**

A unique thread design and quality controlled manufacture spell the Zip-in® difference.

Zip-in's® sophisticated heat treat process allows the screw to taper to a fine, sharp point without sacrificing critical point strength. A single starting thread (A) is machined down to the very tip of the point and is the source of Zip-in's® penetrating power. The second thread (B) above the point engages after initial penetration and moves the screw through very fast. Zip-in® screws are faster driving, with a greater capacity for fastening heavier gauges of sheet metal than any other self-drilling type.

## 1. Undercut-Indented Hex Washer Slotted Head

- Undercut - Always seats flush

## 2. Burr Free hex washer slotted head

- One 1/4 in. hex driver accommodates all sizes of Zip-in Screws
- Full 1/4 in. (No. 8) head will not strip out of hex driver opening at any-time during operation.

## 3. Combination Lead Double Thread

- Starting thread machined down to very tip of screw point
- Instantly penetrates and engages in heavy gauge sheet metal and layered light gauge

## 4. Sharp Tapered Point

- Quality controlled heat treat
- Sharp tapered point will not mushroom, break or walk
- Complete operator control with precise hole alignment.

U.S. Patent No.

## Plastic Anchor Kits / Anchors

### PA1012K

All Red-Lip Anchor  
Kits contain equal  
quantities of anchors  
and screws with one  
matching carbide  
tipped drill bit.

Use Red-Lip Anchors with wood,  
sheet metal or lag screws.  
Flexible anchor is ideal for  
masonry or stone. Lip on collar  
prevents anchor from pushing  
through hole in hollow walls.

Consult Malco Price Book for specific package  
quantities available for each screw size.
