

- Spray on - wipe off
- Cleans & protects in minutes!
- Removes dirt & stains
- Restores original shine
- The perfect “finish” to every job
- For use on all painted metal surfaces of outdoor A/C condensing units

Description

A/C Shine is specially formulated to clean and protect the painted metal surfaces of outdoor A/C condensing units. A/C Shine cleans dirt and stains, restores, shine, and leaves a protective finish against harmful outdoor elements like UV rays. It sprays on and wipes off quickly and easily without water. To provide the perfect finish, use A/C Shine on every service call.

Application

For outdoor painted metal surfaces of A/C condensing units, generators and other painted outdoor equipment. A/C Shine can also be used to clean and protect the furnace cabinet after service. Apply A/C Shine annually, or each time the system has been serviced, and needs a fresh new finish!

Directions

This product must be used in accordance to the following directions by HVACR professionals only. Shake can well. Spray a section of the unit & wipe off with a soft cloth. Turn cloth and wipe lightly to enhance shine. Reapply for stubborn dirt or greater shine. Use on painted surfaces only. For applications with painted grill coverings or fan coverings, spray a cloth with A/C Shine, and apply to the painted surface using the cloth. This will protect the condenser fins from being coated. Use A/C Shine at least once a year to clean and protect A/C units after each time the condenser coil has been cleaned or serviced, or if heavy exposure to UV light has dulled the finish.
