89DC	UV Pocket Light	EA	12

LEAK SEALANTS

Super Seal Flex Inject®

Super Seal Flex Inject® is the fastest, most effective proven way to permanently seal and prevent minor air conditioning and refrigeration (AC/R) leaks. With no tools or gauges required, the Flex Inject® sealant works by travelling through the system with the oil and refrigerant fixing leaks immediately (up to 300 microns). Flex Inject® works with all compressors, heat pumps, condensers, and other system components and it will not plug up manifold gauges, metering devices, thermostatic expansion valves (TXVs), pistons or cause cap tube blockages. It meets the ASHRAE ARI 700 refrigerant standard and is compatible with any refrigerant including R-410A with no pump downs or recoveries required. Flex Inject® is suitable for use in aluminum and copper coils and is microchannel friendly.

940	Super Seal Sure Shot™, 1/4 in. SAE Reusable Hose	EA	1

Seal-N-Go® Self-Sealing Refrigerant

Seal-N-Go® is an excellent solution for taking R410A refrigerant on job sites and includes Super Seal Advanced™. It allows technicians to fill and stop and prevent leaks simultaneously. With a reusable charging hose (sold separately), the 25.7 ounce lightweight cannister is great for topping off multiple systems and perfect for mini-split installs. Reusable charging hose (20133) sold separately.
